For Immediate Release

POLYURETHANE MACHINERY CORPORATION (PMC)

On the Road with PMC **Redefining the way equipment is demonstrated.**

LAKEWOOD, NJ – April 20, 2016 – [Polyurethane Machinery Corporation \(PMC\)](#) has redefined demonstration with its unique Mobile Equipment Showroom. Outfitted with the capability to swap proportioners with ease and housed with enough power and air supply to run every product PMC produces, the Mobile Equipment Showroom has generous functional features including a large workbench, a spacious toolbox, extensive cabinetry, an A/C heating unit and drum heaters. A special unique feature of the Showroom is a mobile spray booth which utilizes an enclosure that enables customers to feel the spray gun and observe the spray pattern while watching the machine run. With safety always a top priority at PMC, full-face respirators and an OSHA-approved portable eyewash station are always included onboard. This Mobile Equipment Showroom effectively displays the equipment and stands as an example of what a properly outfitted mobile spray foam rig should look like out in the field.

Recently, the PMC team took the Showroom on the road to Orlando, Florida for the 2016 SPFA Convention. Once they arrived, they set up camp for an unprecedented and successful training base for all of the convention's attendees and for those signed up for the Spray Foam Alliance Professional Certification Program (SPFA PCP). The SPFA PCP is an internationally recognized, only-one-of-its-kind program built for those involved in the installation of spray polyurethane foam. Covering roofing and insulation applications, the program advocates industry best practices and safety.

Visitors began arriving immediately, showing a tremendous interest in the Mobile Equipment Showroom. The rig received many accolades for its professional presentation and appearance. Its rugged construction and user-friendly equipment were very well received by everyone. Visitors were also welcomed with the unveiling of PMC's newest product introductions as well as receiving completion of certified training courses.

Continuing its commitment to meet with customers face-to-face, PMC is hitting the road again. Next stop - Georgia! The company hosted an open house for local distributors on April 18th at Prime Resins and we have a few openings for the balance of this month. The spring schedule is filling up, and more training sessions are being scheduled across the country. We look forward to bringing our Mobile Equipment Showroom to your location for a first-hand up close look at the quality PMC plural component equipment.

###

POLYURETHANE MACHINERY CORPORATION

To schedule the PMC mobile rig for a visit at your nearest distributor location or on the job-site, please contact Craig Griffin or just complete the form on our website - <http://polymac-usa.com/mobile-equipment-showroom/>
