POLYURETHANE MACHINERY CORPORATION (PMC)

**POLYURETHANE
MACHINERY
CORPORATION**

Celebrating 10 Years, PMC Delivers on Product, Partnership and Pride at SPFA 2017!

LAKEWOOD, NJ – February 20, 2017 – [Polyurethane Machinery Corporation \(PMC\)](#) continued to give people something to talk about at this year’s SPFA Convention in Palm Springs, California. As one of the premier sponsors, PMC celebrated 10 years in the business and remains completely dedicated to introducing new INNOVATIVE and AFFORDABLE products along with OUTSTANDING service to their customers.

PMC sat front and center at the exhibit and received a very positive response from visitors on the openness and focus of the booth. The design provided a great opportunity for demonstration of products and an environment that encouraged meaningful discussions with the PMC sales team, technical support team and top executives.

It’s not surprising that the **NEW PX-7 Mechanical Purge Gun** was a big hit at the show. PMC customers asked...and they received! PMC unveiled the PX-7 with great accolades. Economically priced, it incorporates a valving rod to mechanically purge the mixed material from the mixing module at the end of each shot; and eliminates the need for solvent flushing or air purge. It is ideal for slab jacking, roofing, residential foam and coatings. Models are available for pour, low output coatings and high output spray foam and coatings. This gun has it all and it’s the right price!

In addition to PX-7, AP-2 and the AP-EX Spray system demonstrations, the signature PMC proportioners were on display. Among these machines, PMC showcased the **“Classic” PH/PHX-55**, their highest output proportioner. Ideal for the basic contractor with its rugged design and affordable price, it offers many benefits such as Pressure Balance Control (PBC), an Inlet Monitoring System, a Proximity Reversing System, Count Down Counter and Point-to-Point Wiring. Customers provided very positive feedback on all of PMC’s machine designs citing favorably the absence of printed circuit boards. The open design makes it easy to service and repair compared to the competition.

Mike Kolibas, President of PMC, stated “The show was very informative and PMC came away thankful for our customers and satisfied that we are providing a quality product and excellent service to the industry. We are also very proud and excited to celebrate our 10 year anniversary in 2017. As always, we are grateful for the opportunity to showcase our products, reinforce our commitment to the industry and continue building the strong customer relationships and business partnerships we’ve enjoyed through the years.”

Polyurethane Machinery Corporation (PMC) manufactures equipment and accessories for use in the urethane industry. At PMC, the service does not stop with the sale. PMC provides its customers with outstanding sales and technical service through a worldwide network of distributors.
